

Abstract: This paper discusses the concept of dialogue as it is the most important means of knowledge and its effects on calling (Dawa) and education.

Quaran focused on dialogue, and so did the prophets (Peace of Allah be upon them) and their followers.

Dialogue reinforces beliefs and religious knowledge, and through it people convert to Islam in peace and tranquility. Moreover, it affects communicators irrespective of cultures and attitudes.

Dialogue has effects on education since it enables students to acquire knowledge, self-confidence, cooperation and communication with others.

Therefore, this topic should be studied thoroughly in all fields of life.
